

THE 3RD VACCINE RENAISSANCE CONFERENCE

Institute for Immunology and Informatics

REGISTER NOW

October 27 - 29, 2009

The 3rd Vaccine Renaissance is dedicated to creating a dynamic interchange, by bridging disciplines (immunoinformatics, vaccine delivery, clinical vaccine trials and basic research) while offering multiple opportunities for contact between academic researchers and members of the vaccine R&D biotech industry.

Speakers will describe new approaches to developing vaccines for today's most significant infectious disease threats such as influenza, neglected tropical diseases, multidrug resistant tuberculosis, and HIV.

- New vaccines for H1N1 flu
- Advances in Neglected Tropical Diseases (NTD)
- Cutting edge vaccine delivery techniques
- Vaccine design workshop (iVAX)
- Hands-on demonstrations of ELISpot and FACS technologies

GENERAL: Claude Imbault
cipvd08@gmail.com

CONFIRMED SPEAKERS:

MARIA ELENA BOTAZZI, PhD	Sabine Vaccine Institute
CHARLES DELISI, PhD	Founding Chair, Bioinformatics & Systems Biology, Boston University
PENELOPE DENNEHY, MD	Director, Pediatric Infectious Diseases at Hasbro Children's Hospital
CHRISTIAN MANDL, MD, PhD	Global Head of Virology, Novartis Vaccines and Diagnostics
DAVID SACKS, PhD	Laboratory of Parasitic Disease of the National Institutes of Health (NIH)

WHERE: University of Rhode Island – Feinstein Providence Campus (Downtown Providence)

WHEN: Tuesday, October 27 - Thursday, October 29

WHO: Vaccine researchers/ vaccine developers/clinical trialists, regulators/medical professionals involved in the administration of vaccines/biotech professionals, vaccinology and biotechnology students should attend

COST: NO REGISTRATION FEE *****PRE-REGISTRATION IS REQUIRED*****

POSTER ABSTRACTS NOW BEING ACCEPTED: Send to VaccineRenaissance3@Gmail.com
